

COMPANY OVERVIEW

Alyph Group LLC is a registered holding and business-services company that owns and operates a growing family of specialist businesses spanning technology, compliance, finance, media, education, contracting, and retail — and puts that same in-house expertise to work as a consultant for organizations outside the Group, including federal, state, and local government agencies and their prime contractors.

Core Competencies

AI & Automation Systems

Workflow automation, AI agent systems, and custom software development for organizations that need to move faster without a full in-house build team.

Compliance, Quality & Validation (CQV)

Regulatory and compliance advisory, quality validation consulting, and audit-readiness support for regulated environments.

Government Contracting & Procurement Support

Proposal support, contract review, and procurement guidance for organizations pursuing federal and state government work.

Financial & Investment Advisory

Market analysis, financial planning, and advisory support for businesses and institutional clients.

Brand, Media & Content Production

Brand development, content production, and creative direction for organizations that need a professional presence without a full in-house studio.

Business Strategy & Operations Consulting

Operating-model design, planning, and process improvement drawn from experience running Alyph Group's own portfolio of companies.

Education & Training Program Development

Custom course and training-content development for organizations onboarding or upskilling staff.

Differentiators

Multi-disciplinary in-house bench

Technology, compliance, finance, and creative capability under one holding structure — no subcontracting required to staff a cross-functional engagement.

SAM.gov-registered

Positioned to pursue and support federal contract opportunities directly or as a subcontractor.

Shared infrastructure, dedicated focus

Each business unit runs independently in its own market while drawing on the Group's shared finance, compliance, and operations backbone.

Consulting informed by operating experience

Advisory work is grounded in capabilities Alyph Group uses to run its own companies, not theoretical frameworks.

Past Performance

Alyph Group LLC and its business units are an actively growing portfolio. A detailed summary with contract and engagement references is available on request as our project history develops.
